

TELEPHONE KEYPAD (“STAR”) COMMANDS

If you are participating via a telephone, use your telephone keypad to manage the meeting (hosts only) and your own meeting experience (host and guests). These “star” commands are always available.

Audio and help commands are available to the host and all guests; they assist you in contributing to and listening to a meeting. If you are the host, additional commands let you manage your meeting.

On your telephone keypad, press the star (*) key and then the command number.

Manage the Meeting (Hosts)
